

Carbon reduction plan Guidance

Notes for Completion

Where an In-Scope Organisation has determined that the measure applies to the procurement, suppliers wishing to bid for that contract are required at the selection stage to submit a Carbon Reduction Plan which details their organisational carbon footprint and confirms their commitment to achieving Net Zero by 2050.

Carbon Reduction Plans are to be completed by the bidding supplier¹ and must meet the reporting requirements set out in supporting guidance, and include the supplier's current carbon footprint and its commitment to reducing emissions to achieve Net Zero emissions by 2050.

The CRP should be specific to the bidding entity, or, provided certain criteria are met, may cover the bidding entity and its parent organisation. In order to ensure the CRP remains relevant, a Carbon Reduction Plan covering the bidding entity and its parent organisation is only permissible where the detailed requirements of the CRP are met in full, as set out in the Technical Standard² and Guidance, and all of the following criteria are met:

- the bidding entity is wholly owned by the parent
- the commitment to achieving net zero by 2050 for UK operations is set out in the CRP for the parent and is supported and adopted by the bidding entity, demonstrated by the inclusion in the CRP of a statement that this will apply to the bidding entity
- the environmental measures set out are stated to be able to be applied by the bidding entity when performing the relevant contract
- the CRP is published on the bidding entity's website

Bidding entities must take steps to ensure they have their own CRP as soon as reasonably practicable and should note that the ability to rely on a parent organisation's Carbon Reduction Plan may only be a temporary measure to satisfy this particular condition of participation.

¹ Bidding supplier or 'bidding entity' means the organisation with whom the contracting authority will enter into a contract if it is successful.

² Technical Standard can be found at:
https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/991625/PPN_0621_Technical_standard_for_the_Completion_of_Carbon_Reduction_Plans__2_.pdf

The Carbon Reduction Plan should be updated regularly (at least annually) and published and clearly signposted on the supplier's UK website. It should be approved by a director (or equivalent senior leadership) within the supplier's organisation to demonstrate a clear commitment to emissions reduction at the highest level. Suppliers may wish to adopt the key objectives of the Carbon Reduction Plan within their strategic plans.

A template for the Carbon Reduction Plan is set out below. Please complete and publish your Carbon Reduction Plan in accordance with the reporting standard published alongside this PPN.

Carbon Reduction Plan Template

Supplier name: ...PE & JE Healthcare Limited.....

Publication date: 16/07/2025.....

Commitment to achieving Net Zero

[PE & JE Healthcare Limited] is committed to achieving Net Zero emissions by 20**45**.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

[Instructions to Suppliers:

Please provide details of your organisation's baseline emissions below. If your organisation has not previously assessed or reported emissions, please detail this below and use your first reporting period as your Baseline.]

Baseline Year: 2023
Additional Details relating to the Baseline Emissions calculations.
[Instructions to Suppliers:
<i>Add commentary regarding your Baseline Emissions as required: e.g. historic baseline which deviates from the requirements under this measure (e.g. no prior Scope 3 emissions reporting), where there is no previous reporting and the creation of a new baseline due to substantial organisational change or restructuring]</i>

Baseline year emissions: 2023	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0 tCO ₂ e no vehicle owned
Scope 2	1-2 tCO ₂ e small office usage
Scope 3 (Included Sources)	0-2 tCO ₂ e staff recruited locally
Total Emissions	3 tCO ₂ e

Current Emissions Reporting

Reporting Year: 2024/2025	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0 tCO ₂ e
Scope 2	1-2 tCO ₂ e
Scope 3 (Included Sources)	0-2 tCO ₂ e
Total Emissions	3 tCO ₂ e

Emissions reduction targets

[Instructions to Suppliers:

if your organisation already has emissions reduction targets, please give those targets.

If your organisation has no previous emissions reduction commitment, or if this is your organisation's first carbon footprint, please provide targets for your organisation]

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 10% tCO₂e by 2030. This is a reduction of 10%

Progress against these targets can be seen in the graph below:

Carbon Reduction: Projected vs. Actual

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 20XX baseline. The carbon emission reduction achieved by these schemes equate to XX tCO₂e, a XX%ge reduction against the 20XX baseline and the measures will be in effect when performing the contract

[Instructions to Suppliers:

PE & JE Healthcare Limited has already implemented several measures that contribute to lowering our carbon footprint, notwithstanding that we are still getting ready to be ISO14001 or PAS 2060 certified.

1. Local Workforce Deployment: We prioritise recruiting and supplying healthcare staff within local areas, which significantly reduces travel distances and associated emissions.

2. Reduced Office Energy Use: Our small office is operated with energy-efficient practices, including switching to LED lighting and ensuring that unused equipment is turned off outside working hours.

3. Digital-First Operations: Wherever possible, we minimise printing and use of digital tools for bookings, timesheets, contracts and communications, reducing paper and ink usage.

4. *Virtual Meeting: Adoption of video conferencing platforms for meetings and training sessions to reduce unnecessary travel. Briefly provide details of some of your completed carbon reduction projects. This is for information only.*

5. *Recycling and Waste Reduction: Office waste is separated and recycled with local authority schemes..]*

Future carbon reduction initiatives

In the future we hope to implement further measures such as:

[Instructions to Suppliers:

Looking ahead, PE & JE Healthcare Limited intends to strengthen its sustainability efforts by implementing the following measures:

1. *Green Energy Commitment: Transforming to renewable energy tariff for our office premises.*
2. *Low-Emission Travel Policy: Encouraging staff to use public transport or car-sharing where practical and exploring the introduction of electric vehicles for company use.*
3. *Net Zero Alignment: Reviewing opportunities to align with recognised framework such as Science Based Targets Initiative – SBTi, and working towards environmental certifications such as ISO 14001 (Environmental Management and/or PAS 2060 (Carbon Neutrality]*

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard³ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting⁴.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for
